

Heart Printing

You will need:

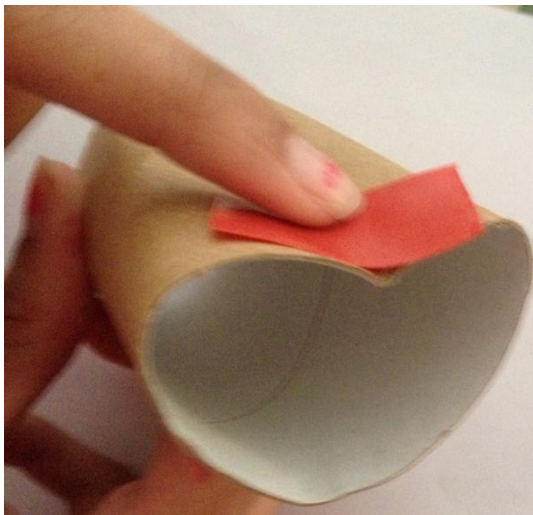

- A blank piece of paper.
- Pink and red poster paint or whatever colour you would like your hearts to be.
- A flat tray to pour the paint out in.
- Toilet rolls or kitchen paper rolls.
- Masking tape.

Step 1:

Squeeze your toilet roll or kitchen paper roll on both sides and then towards the middle so that it looks like a heart shape.

Step 2:

Place some tape over the top of the roll so that it doesn't lose its shape when printing.

Step 3:

Pour some poster paint into a flat tray. You will need a separate tray for each colour.

Step 4:

Dip the end of the roll with the heart shape into the paint and then onto the paper to print.

If you use butchers paper or a large sheet of paper you can use this for wrapping paper.

Happy printing!
