# Why Workplace Giving Matters

## Why your support matters

Every day, 8 babies are born with childhood-onset heart disease (CoHD). Many will face open-heart surgery, lengthy hospital stays, and lifelong medical care.

HeartKids walks with families through every stage of this journey— from diagnosis, in hospital, and into adulthood.

## Workplace giving is one of the most effective ways to help.

Your regular pre-tax donation provides steady support, helping us be there when families need us most.

## Donate

Nominate HeartKids through your payroll system and set up pre-tax donations. Even \$5 per pay makes a real difference. Many employers offer donation matching—ask your HR team if yours does.

## Volunteer

Get your team involved in meaningful activities, like care pack drives, in-hospital support, or event day volunteering.

## Participate

Join a community event like Two Feet & A Heartbeat or Heroes for HeartKids.

Your workplace can walk, dress up, fundraise or sponsor an activity—all while showing your heart.

**Together, we can support more lives well-lived.**
